**Frameworks & Tools:** React, Vue, Vite, Tailwind CSS, Bootstrap, Cypress, Docker, PostgreSQL, Redis, Nginx

**Programs & Applications:** VS Code, Git, GitHub, Vagrant, VirtualBox, DigitalOcean, AWS

## PROFESSIONAL EXPERIENCE

### Software Developer

*Submittly (Rensselaer Center for Open Source)*

*January 2025 - Present (Full-Time Summer 2025)*

- Created a Vue component backed by a complex SQL query for the home page to give users a streamlined view of notifications from all of their courses.
- Developed an interactive editor using PHP, Twig, and JavaScript, enabling instructors to modify uploaded configurations.
- Leading the deployment of Submittly's cloud infrastructure to make it accessible to other institutions without self-hosting.
- Mentors new contributors in a collaborative setting, guiding onboarding while coordinating progress and design discussions.

**Troy, NY**

### IT Technician Intern

*Stewart's Shops*

**Saratoga, NY**

*May 2024 - August 2024*

- Delivered on-site and remote technical support by troubleshooting and repairing register, ATM, and networking equipment.
- Utilized a ticketing system to document issues and resolutions, ensuring accurate tracking and timely follow-up.
- Collaborated with other technicians to prepare 10% of all shops for a transition to a new POS register system.

### Shift Supervisor

*Price Chopper Supermarket*

**Mechanicville, NY**

*June 2020 - October 2024*

- Supervised the Front End department, overseeing customer service, employee scheduling and training, task delegation, facility maintenance, and financial reconciliation.

## PROJECTS

### Cookie Coder

*September 2025 - Present*

- Full-stack web application combining coding lessons with tycoon-style gameplay to facilitate learning through repetition.

### Speed Roulette | [speedroulette.io](http://speedroulette.io)

*February 2025 - September 2025*

- Designed a dynamic front-end using React, TypeScript, and Tailwind CSS that features a dark mode toggle, responsive scaling, interactive components, and fast-paced gameplay to deliver an engaging user experience.
- Built a Go backend API secured with middleware authentication to separate core game logic from the user interface.
- Implemented an extensive CI/CD pipeline with linters, formatters, Cypress E2E tests, and unit tests.

### RPI Principles of Software Course Website Revamp

*May 2025 - September 2025*

- Overhauled the site's user interface with a complete visual redesign, adding responsive scaling and dark mode to enhance the user experience for over 200 active students each term.
- Streamlined maintainer workflow by establishing a Git-based workflow and creating a reusable template of the user interface.
- Simplified the codebase by replacing Bootstrap with custom CSS and creating modular components with JavaScript.
